Summary

Access track maintenance works were completed between Donnybrook and Wandong, including vegetation clearance, tree trimming near low voltage conductors, and mulching of blackberry and other invasive species. All works were finalised following machinery repairs, ensuring safe access to the ARTC generator and compliance with easement requirements.

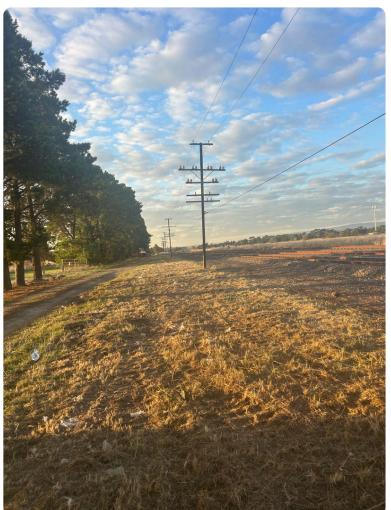

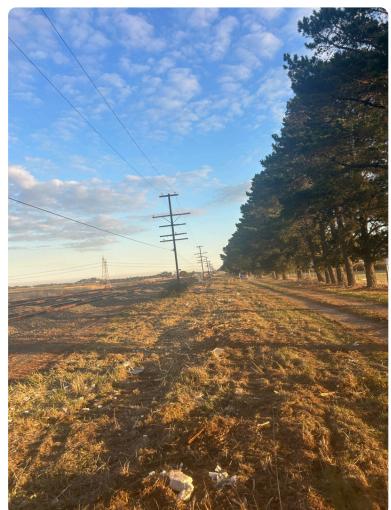

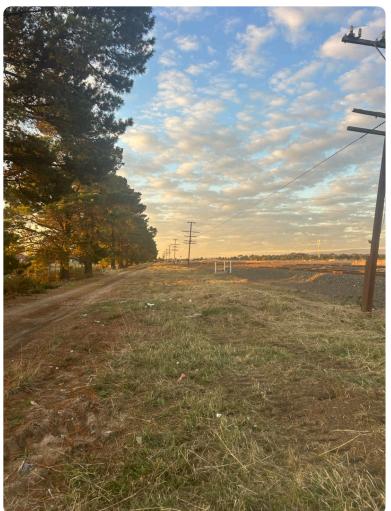

Key Findings

- Vegetation was cleared from poles, powerlines, and easement areas.
- Tree trimming was performed to maintain safe distances from low voltage conductors.
- All gorse, blackberry, and English broom were mulched to ground level.
- Delays occurred due to machinery damage, but all works were completed by 23 June 2025.
- Access to the ARTC generator was reinstated as per specification.
